

Dear Oklahoma politicians,

Thank you for not supporting public transportation. Your generous advocacy for building more roads is greatly appreciated. Your subsidies for the trucking industry are critical to our success. The petro-dollars you send to the Middle East give us the resources we need to kill your soldiers and any civilians who get in our way. To continue your unbroken record of help for our cause, I recommend the following public policies:

- + The state legislature and county governments should continue to ignore mass transit. Cut existing bus service at every opportunity. Destroy the rail interchange at Union Station in Oklahoma City as soon as possible.
- + Build more four and six lane highways. This has the additional benefit of hastening the destruction of rural communities that are by-passed by your freeways. People will then move to larger cities where they will be easy targets for nuclear terrorism.

These actions will drive increased gasoline and diesel consumption. More money for me! I promise to repay your generosity with death, suffering, and destruction. Politicians of Oklahoma, I salute you! You are among my best friends and supporters anywhere in the world.

Sincerely,

Osama Bin Laden
